### **Importance of professionalisms for specialists in geological sphere**

The aim of this report is to outline the features of professionalisms which are used every day in the work environment. It will also include professionalisms in the geological sphere. Professionalisms are words or expressions related to the speech of a particular professional group. As we know, terms are legal names of any special concepts and professionalisms are used as their unofficial substitutes. Also, professionalisms are similar to jargon and words of colloquial vocabulary and denote special concepts, tools or products of labor, labor processes of production. Therefore, they are sometimes called special words or special terms.

First of all, I want to mention that we live in a country that is growing rapidly in different fields. For this reason, our country requires specialists who know three languages; it is the most important quality of young specialists in our time. Why should young specialists know three languages? One of the basic reasons is that our country cooperates with many other countries and our specialists have the opportunity to work abroad. And of course, knowledge of three languages is important in different fields.

Furthermore, culture plays a role in the mess of professional words. Words have contrasting explanation depending on the cultural background. For example, in the foreign company workers use professionalisms in English and in national companies they use Kazakh or Russian terms replaced to professionalisms. In this way professional jargons can be very confusing because the genuine meaning may not be transferred. Professionalisms are a means of communication among specialists in a certain field. It should be emphasized, that knowledge of professionalisms in three languages is a success in the career of a young specialist and, of course, knowledge of professionalism will help the specialist to be <<on the same page>> with his / her colleagues. According to this article, I would like to show you the top of the common professionalisms in different fields.

Professionalisms in English	Meaning in Russian	Field
Dirt	Деньги	Accounting
Big-boy	Крупнокалиберная пушка	Military
Knitting needle	Сабля	Military
Sleeper	Курс лекции	From student vocabulary

Shark	Студент-отличник	From student vocabulary
Suicide ditch	Передовая	Military
Flu	Грипп	Medicine

However, professionalism can sometimes be a barrier in communication with specialists, because nowadays one word can have different meanings. We all know that times are changing and words take on new meanings. In such cases, it is better to define what the specialist mean. In addition, one famous person said that knowledge the professionalisms is knowledge your own specialty well, and I absolutely agree with him.

Secondly, professionalisms in geological sphere should be underlined. As in all other fields, in geology, professionalisms are also used in the speech of specialists. Of course they differ from others and have their own meaning. It should be mentioned, that Geological Prospecting College cooperates with many companies abroad and our students undergo practical training in these companies. According to this fact, I conducted a survey among students of our college, asked everyone the same question << Is it important to know the professionalism in the field of geology in three languages?>> and 75% of 100% answered “yes” and basically they were third and fourth year students, that is, students who have already been on practical training. Relying on a questionnaire among students, we can note, that knowledge of professionalism in three languages is significant in our time, despite the fact, that until this time people could manage without it. Nowadays it is like <<work experience>>, that is, what employers pay great attention to. The main reasons for using professionalisms in geological sphere:

- 1) Knowledge of professionalism is the key in communicating with highly experienced professionals in geological sphere;
- 2) In every field there are professional words and to be one of the best worker in geological sphere you should have the opportunity to understand the speech of professional, because it is different;
- 3) Learning professionalisms will improve your work experience;
- 4) Knowledge of professionalisms will lead you to the mutual-understanding among the specialists;
- 5) Knowledge of professional words will help you work in the right direction.

As I have mentioned, our students do practical training and can make their own vocabulary of professionalisms. With the help of our graduates and also third and fourth year students, we would like to present the vocabulary of professionalisms which are often used in the geological field.

Special terms in Russian	Professionalism in Russian	Special terms in English
Контакты для соединения прибора с наконечником	Семечки	Contacts for connecting the device to the tip
Мультиметр	Цэшка	Multimeter

Стандартный комплекс геофизических методов	Первичка	Standard set of geophysical methods
Отстойник расположенный изнутри	Рыба	Sump located outside
Собирать провода в виде восьмерки	Восьмерка	winding

Professionalisms in English	Terms in Russian	Terms in Kazakh
Christmas tree	Превентр	Превентр
Monkey board	Буровая вышка	Бұрғылау мұнарасы
Catwalk	Область рядом с буровой площадкой, где керны обрабатываются сразу после их поступления на борт	Бұрғылау алаңына жақын жер, ол жерде негізгі сынамадар бортқа түскеннен кейін өңделеді
Dog bone	Гаситель вибрации	Діріл дампері
Elephant ear	Изолятор	Оқшаулағыш
Worm	Неопытный нефтяник	Тәжірибесі жоқ мұнайшы

To conclude, professionalisms can be found everywhere around the world because it is a part of the colloquial language that people use every day in different fields, the expressions that you use to communicate with other workers in a work environment. It should be emphasized, that we should learn the slangs and professionalism in three languages which we will use in our future work place to communicate with colleagues, because it is the key to the future. I would like to summarize that formula of success: work hard, learn everything new and achieve your goal.
